

TECH DRIVEN. PEOPLE POWERED.

Solution Brief: Wingman Virtual Chief Information Security Officer (vCISO)

Part of Wingman GRC

Do you need a cyber security expert in your company, but can't justify the expense of a full-time employee? Is the cyber skills shortage making it difficult to find the right set of skills? Is your business going through a transition leaving you between CISOs? Are you facing specific compliance requirements, and need some short-term help?

Wingman vCISO could be your answer.

A virtual CISO (vCISO) is an experienced cyber security professional who lends their skills to organisations on an ad-hoc, remote or on-demand basis. This gives an organisation access to many of the benefits of an in-house CISO but without the costly overheads.

Some businesses turn to Fractional CISOs to solve this problem, hiring a cyber security professional on a part-time basis. This solution lacks the flexibility and scalability of a vCISO.

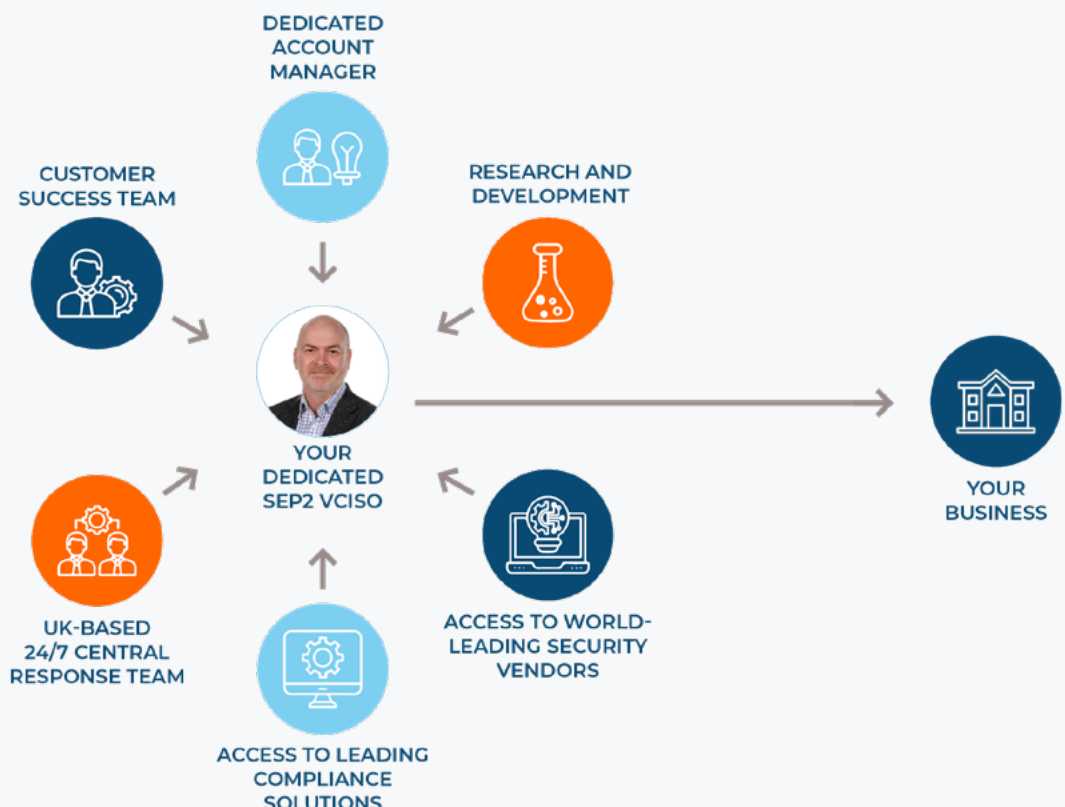

Wingman vCISO will:

- ✓ Improve your company's **cyber security posture**
- ✓ Be an **on-hand resource** for questions and assurance
- ✓ **Save your business money** compared to a full-time equivalent
- ✓ Make vendor-agnostic recommendations on the **best security solutions**
- ✓ Provide a **scalable solution** – from ad hoc cyber security health checks to long-term support
- ✓ Help your business achieve **compliance requirements** such as ISO27001, Cyber Essentials or GDPR
- ✓ Ensure your business meets growing cyber security **insurance requirements**
- ✓ Participate in **executive and board meetings** to ensure cyber security considerations are addressed and to advocate for investment

What makes Wingman vCISO different

SEP2's Wingman vCISO service provides the benefits of a single point of contact, with the added breadth of knowledge, experience and support from a wider team.

The benefits of using Wingman vCISO service

Your dedicated Wingman vCISO

SEP2's vCISOs are all experienced professionals with first-hand operational experience across various industries and sectors. The team also holds the highest industry accreditations, such as CISSP.

UK-based 24/7 Security Operations Centre (SOC)

Cyber criminals don't follow 9-5 working hours. Luckily, SEP2's vCISO works alongside our 24/7 UK-based SOC, so if any incidents occur out of hours you can rest assured that someone from SEP2 will be on hand.

Access to leading compliance solutions

SEP2 partner with leading compliance solution providers such as Cynomi and Drata to ensure that policies, procedures and frameworks are always live, thus avoiding the yearly rush to update policies for compliance audits.

Research and Development

When SEP2's 24/7 SOC are not dealing with potential security breaches, they are in the lab doing R&D to mitigate against potential future threats. As an organisation with touchpoints across the breadth of the security ecosystem, SEP2 has a wide range of knowledge and experience to draw on.

Customer success team

SEP2 are always increasing our service capability, but never lose sight of the quality of customer service. We have a dedicated Customer success team offering their support to you every step of the way.

Access to world-leading vendors

SEP2 are one of the largest independent cyber security partners in the UK, which means we have access to fantastic people and technologies from our vendors. As an organisation we have leading threat intelligence and network security resources at our disposal.
